OPTIONAL CUSTOM TWO-TIER CONSUMER RESEARCH

CoOptions' Sampling Store will provide custom brand-specific two-tiered consumer research to provide you with consumer insights and track conversion over a 30 day window. Here's how it works:

Core Survey:

- **Consumer Invitation & Reward:** We will design and print custom branded 4" x 6" post cards with dedicated URL and QR code for attendees to opt-in to complete the survey on our secure online SurveyMonkey portal. Post cards will be handed to attendees at expo booth with samples. Each respondent that fully completes the survey will receive a \$10 Amazon eGift Card.
- **Signage:** We will design, print, and display a custom 8.5" x 11" acrylic sign at the health expo which also includes the core survey URL and QR code.
- **Survey Questions:** Our core consumer research is robust, covering demographics, category, and brand-specific questions (limited to 18 questions):
 - Basic demographics (age, marital status, gender, HH income, education, etc.)
 - Brand awareness and previous experience / usage
 - Category purchase behavior (frequency, pack rate, class of trade)
 - Category usage occasions and consumption behavior
 - Competitive category purchases in past "X" months (you provide competitor list)
 - Category attribute preferences (e.g., taste, variety, texture, effectiveness, convenience, pricing, etc. – you provide up to 6 top attributes for consumers to rate)
 - Brand ratings on category attribute preferences (or simple product scale ratings)
 - Open-ended comments on what respondents liked best about your product they tried
 - Open-ended comments on what respondents liked least about your product they tried
 - Likelihood to purchase the product in the next 30 days
 - Opt-in to take our follow-up purchase conversion survey 4 weeks later (link sent by email, also with consumer reward).

Follow-Up Purchase Conversion Survey:

- **Survey Questions:** Follow-up conversion research focuses on purchases and usage behavior (limited to 10 questions):
 - Purchase conversion (did they purchase, still plan to purchase, not planning to purchase, or already a brand consumer) – you can also ask what SKU(s) were purchased.
 - Where did they purchase (class of trade), how many times (frequency), and how much at a time (pack rate)?
 - Where did they use your product they purchased (if purchased)?
 - Did their purchase supplement or replace another category product already in household?
 - Open-ended comments on brand

COSTS: Cost to design, implement, and report core research results and insights (including post cards and signage displays) is \$3,000 base fee plus \$10 for each respondent survey reward (100 core and 50 conversion survey minimum completed surveys). So, a two-tiered research with 100 core and 50 conversion surveys is \$3,000 base fee plus \$1,500 respondent rewards or \$4,500; research with 200 core and 100 conversion surveys is \$3,000 base fee plus \$3,000 respondent rewards or \$6,000, etc. Brand are allowed two rounds of edits to each survey. Full report with research analysis provided in addition to brand event recap.
